SLAB LIFTING HANDLE

Supports for outdoor raised floors
Accessories for installation

DESCRIPTION

PPL/MM is a useful and practical handle for lifting and laying self-supporting slabs of various sizes – made of ceramic, natural stone or concrete – in outdoor raised floors.
It consists of a metal body with plastic inserts. The ergonomic grip makes it easy to hold the slab lifting handle, and the levers allow the opening to be adjusted from 39 to 62 cm.

FEATURES AND BENEFITS

- Ergonomic grip for extra comfort
- Adjustable to suit the size of the slab to be installed
- Wide range of adjustments from 39 to 62 cm
- May be regulated to suit non-standard sizes
- May be closed to take up less space when not in use

HOW TO USE THE PRODUCT

Prior to installation, make sure the sides of the slab to be moved are compatible with the device.

- Release the levers securing the opening of the slab lifting handle.
- Place the handle on the slab to be moved, adjusting its opening.
- Secure the handle's opening position on the slab by operating the levers.
- Use your thumb to release the grip at the bottom of the handle so that it rotates on its hinge relative to the top section.
- Lift the slab and place it on the outdoor raised floor supports.

When using this product it is recommended to wear gloves and safety goggles and to follow the safety guidelines for the area in which work is carried out.

WARNING

Although the technical details and recommendations contained in this product data sheet correspond to the best of our knowledge and experience, all the above information must, in every case, be taken as merely indicative and subject to confirmation after long-term practical application; for this reason, anyone who intends to use the product must ensure beforehand that it is suitable for the envisaged application. In every case, the user alone is fully responsible for any consequences deriving from the use of the product.
